

EUTEMPE course MPE09

Achieving quality in diagnostic and screening mammography

LRCB, Nijmegen, The Netherlands

Course leaders:

RE van Engen, I Sechopoulos, WJH Veldkamp

Awarded with 160 EFOMP MPE-CPD credit points

Course consists of an online and a face-to-face part:

- Online: starts January 1st 2017
- Face-to-face: March 27th - 31st 2017 (in Nijmegen, The Netherlands)

The online part covers basic physics in mammography like:

- The imaging chain in full field digital mammography and 3D breast imaging
- Different methods to quantify image quality
- Breast dosimetry
- Quality control protocols & their philosophy

The face-to-face part includes:

- Going into depth in subtopics
- The opportunity to interact with European leaders in the profession
- Multidisciplinary problem solving using real cases ranging from small technical problems to more complex ones
- Invited lectures to give insight in hot topics in breast imaging
- Overview of aspects of breast imaging other than technical and physical
- Small group assignments with presentations and discussions

Application deadline: December 1st 2016. First come first served basis. The application form can be downloaded from: <http://www.eutempe-rx.eu>, click on apply here today. Fill in the form and sent the completed form to: info@eutempe-rx.eu.
